

Altertox is a Brussels-based organization specializing in science communication and research valorization, with a strong focus on toxicology, public health, and sustainability. With over a decade of experience leading dissemination efforts for cutting-edge European research projects (notably under Horizon Europe), Altertox actively contributes to shaping science policy and public understanding through impactful storytelling and strategic engagement. The team is known for its collaborative spirit, creativity, and commitment to translating science into action.

For more information, please visit their website: <https://www.altertox.be>

To support the growth of Altertox, we are looking for a: Science Communication Intern.

- Location: Brussels, Belgium
- Duration: 6–9 months
- Eligibility: Master's students in Science Communication, Life Sciences, or related fields

▲ Responsibilities

As a Science Communication Intern, you will gain hands-on experience in a dynamic environment at the intersection of science, media, and policy.

Your main responsibilities will include:

- Contribute to EU-funded research and innovation projects (e.g. Horizon Europe)
- Support the development of science communication and dissemination strategies
- Create digital content such as infographics, blog posts, and videos
- Manage social media channels and community engagement
- Assist in organizing conferences, webinars, and stakeholder events
- Participate in grant writing and project reporting activities
- Engage with policymakers, researchers, and the public through outreach actions
- Learn to navigate the science-policy-media interface with guidance from senior team members

▼ Profile

We are looking for candidates who:

- Are enrolled in a Master's program in science communication, life sciences, or a related field
- Are available full-time for a period of 6 to 9 months
- Have excellent writing and communication skills in English
- Are creative, curious, and eager to simplify complex scientific topics
- Show interest in EU research projects, science policy, and public engagement
- Thrive in a collaborative and multicultural working environment

▲ Offer

- The opportunity to gain real-world experience on EU-funded research projects
- Mentorship and training from a senior science communication team
- Exposure to policy-making environments, grant writing, and stakeholder relations
- A hybrid and flexible work model adapted to your academic or personal needs
- A chance to make a difference in public and environmental health through science
